SUMMARY

Entry-level Java Software Engineer with strong fundamentals in object-oriented programming, RESTful services, and relational databases. Experienced in supporting application development, testing, and debugging of Spring Boot-based applications. Adaptable team player with strong analytical skills and a willingness to learn, upskill, and contribute in client-focused, consulting-driven environments.

SKILLS

Technical Skills: Java, Spring Boot, RESTful APIs, JWT, Hibernate (ORM), Servlets, JSP, HTML, CSS, JavaScript
Concepts: OOP, Exception Handling, SDLC, Agile Basics, Microservices, Multithreading, Collections Framework
Build & Tools: Maven, Git, GitHub, Jenkins, Docker (Basic), CI/CD Fundamentals
Data & Integration: Apache Kafka, Apache Airflow
Testing & Debugging: Unit Testing, Integration Testing, Debugging
Databases: MySQL, JDBC
SOFT SKILLS: Problem Solving, Time Management, Teamwork, Continuous Improvement, Task Prioritization.

EDUCATION

Bachelor of Technology in CSIT , IES IPS Academy (GPA: 8.4/10) Relevant Coursework: DSA, DBMS, Software Engineering	Aug 2022 — Jun 2026
CLASS 12TH , Science (PCM), (GPA: 7.4/10)	Jul 2021 — Apr 2022
CLASS 10TH , MPBSE, (GPA: 8.7/10)	Jul 2019 — Apr 2020

PROJECTS

1. AI Expense Tracker & Budget Advisor (Java, Spring Boot, MySQL, REST APIs, JWT)

- Implemented a Spring Boot backend with layered architecture, exposing REST APIs to manage user authentication, expense tracking, and analytics workflows.
- Applied JWT-based authentication and role-based authorization, securing 100% of protected endpoints and preventing unauthorized access to financial data.
- Integrated the OpenAI API to generate AI-assisted budget recommendations by transforming monthly aggregated expense data into structured prompts and mapping responses to predefined insight types.
- Enforced rule-based validation and filtering on AI responses, reducing irrelevant or inconsistent recommendations by 30–40% before presenting actionable insights to users.

2. Cattle Breed Identification & Registration System (SIH 2025)

- Built secure, scalable REST APIs with Spring Boot and MySQL for efficient data handling.
- Structured a normalized database schema to ensure efficient data storage and retrieval.
- Automated manual record workflows to improve data processing efficiency.

EXPERIENCE

- | | |
|--|---------------------|
| 1. Java Developer Intern at LincPay Solutions Pvt. Ltd., Bhopal | May 2025 - Sep 2025 |
| <ul style="list-style-type: none">Built and enhanced backend services using Java and Spring Boot following layered architecture principles.Developed RESTful APIs to support authentication, business workflows, and database operations.Secured application endpoints using JWT-based authentication and role-based authorization. | |
| 2. Java Intern at Infosys Springboard | Nov 2025 — Jan 2026 |
| <ul style="list-style-type: none">Completed structured internship training in Java, with hands-on practice through multiple guided coding assignments covering OOP, backend development, and real-world problem scenarios.Practiced API development, database interaction, and logic optimization through guided tasks.Strengthened problem-solving skills by analyzing scenarios and implementing optimized coding solutions. | |

CERTIFICATIONS

- | | |
|---|---------------------------|
| 1. Java (May 24 – Aug 24) Ypsilon IT Solutions - Hands-on training in Object-Oriented Programming, JDBC, and GUI with real-time mini projects. e.g. User Management. | |
| 2. Java Fundamentals , Infosys Springboard | |
| 3. Oracle Cloud Infrastructure 2025 Certified Developer Professional | 4. AWS Certificate |
